EXPERIENCE

Infosys Ltd — Jan 2022 – Present
Senior System Engineer

IBD — Mar 2024 – Present
Project Role: React Developer

- Led the transition of a .NET application to the MERN stack, focusing on front-end development.
- Utilized React.js for building dynamic user interfaces, ensuring a seamless user experience during the migration.
- Collaborated closely with the backend team to integrate Node.js, Express.js, and MongoDB, streamlining the transition process.

Operations Excellence Management System (OEMS) — July. 2023 – Feb 2024
Project Role: React Developer

- Directed a team of 5 developers to build a dynamic case management solution.
- Designed intuitive UIs using React.js, JavaScript, HTML5, and CSS (Tailwind, Material-UI).
- Optimized state management with Redux Toolkit, reducing load times by 25%.
- Integrated secure RESTful APIs for efficient data communication.

Infosys Modular Accounts Payable (IMAP) — Jan 2023 – Jun 2023
Project Role: React Developer

- Developed and maintained the front-end of IMAP, a tool for tracking, viewing, and updating invoice statuses.
- Built user-friendly interfaces using React.js, enabling seamless interaction for users to manage invoices efficiently.
- Implemented features to send automated reminders, improving the invoice processing workflow.

Live Enterprise Application Management Platform (LEAP) — Apr 2022 – Dec 2022
Project Role: Jr. React Developer

- Translated business needs into scalable frontend solutions through direct client interactions
- Designed interactive dashboards with React.js and Tailwind CSS, providing real-time KPI insights.
- Ensured optimal user experience across devices with responsive design.
- Improved application performance by 30% through optimization techniques.
